

Matt Potter, Owner,
Potter Contracting

Building Projects that Last

As Matt always does, he worked with the client to choose high quality products that will not become dated and will endure over time. And, she added, "I love that the work is guaranteed for 10 years. If I sell my home, I can pass along that sense of security to a new homeowner."

At Potter Contracting, which builds everything from additions to decks and patios to roofing, siding, bathroom remodeling and more, quality is consistently and genuinely the focus. Whether looking to update a room, adjust to a growing – or shrinking- family or lifestyle, Potter Contracting offers extensive experience and lasting improvements to increase the value of your home. With a depth of talent and skill, Potter can help beautify an outdoor

environment, designing and installing decks, walkways and retaining walls.

"There are endless possibilities," said Matt, who truly enjoys what he's been doing for more than 30 years and takes great pride in doing it well. "Whether the project is major or minor, our commitment to the highest standards of quality and product lines never changes," Matt assured. There are several pillars that support everything the company stands for, explained Matt. Quality, Craftsmanship, Responsibility and Superior Products make Potter Contracting the exceptional company it is. "We continuously strive to not only satisfy, but exceed, our clients expectations, requirements, time schedules and budgets," Matt said.

For more than three decades, Potter Contracting has served clients throughout Bucks and Montgomery counties with the highest quality construction and remodeling projects. The Dublin-based company has earned its well-deserved reputation of delivering superior work, on budget and on time, by adhering to its motto – *Fine Craftsmanship for Every Part of Your Home.*

"We take great pride in every detail of every job," said business owner, Matt Potter. "We use only the finest products; those that stand the test of time. That's why we guarantee all our work for 10 years."

In an era when some contractors cut corners or look for cheaper materials to get a job done, Potter Contracting takes a very different approach. Rather than short changing its clients, Potter goes the extra mile to ensure each customer, no matter how large or small the project, is completely satisfied when the job is completed. "We utilize a wide range of top brands in our work, and can specify jobs to include your products of preference," said Potter.

Using high quality brands such as Kohler, Certainteed, EP Henry, Viking and Armstrong, Potter Contracting consistently delivers all its projects with the security that comes with using the best product lines. "As we plan a project, we'll be happy to discuss products with each client to help them select the products that are right for them," said Matt.

A recent client in Doylestown called Potter Contracting's work "outstanding." "Working with Matt and his crew is always a pleasure," said the borough woman. "You always have the confidence that Potter Contracting is using the very best products that will last for years and years to come." After Potter Contracting completed a new granite countertop and marbled stone backsplash, "My kitchen never looked so good," said the satisfied customer.

POTTER CONTRACTING

Fine Craftsmanship for Every Part of Your Home

Need Help? No job is too large or too small to discuss with us.

We have done everything from major additions to complete home remodeling to minor repairs on doors, windows, roofs, gutters and downspouts. Some clients even hire us to complete routine maintenance on a regular basis to keep their homes looking wonderful and functioning well.

With more than 30 years experience, Potter Contracting can design, build or remodel every part of your home, office or commercial property.
